CIH

Cybersecurity Innovation Hub II

Your guide to a secure digital transformation.

Co-funded by the European Union

Ministerstvo průmyslu a obchodu

WHO ARE WE?

A continuation of the successful CIH project, the Czech Republic's only EDIH focused solely on cybersecurity.

In line with the Digital Europe Programme (DEP) and the EDIH 2.0 call, CIH II addresses emerging challenges related to the transformative potential of AI technologies, evolving legislation and geopolitical and technological developments.

CIH II supports the transition to an AI-enabled secure society and economy, offering services that help businesses and public entities understand and mitigate cyber risks related to AI.
